5. It is my belief, based upon my personal knowledge of the individual contributions of each of the four authors of the An *et al.* paper, and my understanding of the subject matter of claims 1-11 and 21-31 of the present application that Dr. Songzu An and myself are the only inventors of the present application, and that the An *et al.* paper describes the joint work of Dr. Songzu An and myself.

6. I declare further that all statements made in this Declaration of my own knowledge are true and that all statements made on information and belief are believed to be true and further, that these statements are made with the knowledge that willful statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent granted thereon.
